

British Society for Proteome Research “MJ Dunn Fellowships 2013”

ANNOUNCEMENT

The British Society for Proteome Research is pleased to announce that it will be offering two “MJ Dunn Fellowships” for Ph.D students and early-stage post-doctoral researchers to attend the Society’s annual meeting in Nottingham on 2nd-3rd December 2013.

The fellowships are in recognition of the outstanding contribution made by Professor MJ Dunn to the field of proteomics and to the British Society of Proteome Research (previously the British Electrophoresis Society).

Further details of the meeting are on the Society’s website (www.bspr.org) at: <http://www.bspr.org>

At this stage the BSPR is inviting applications from suitably qualified Ph.D. students and early-stage post-doctoral researchers (i.e. first post-doc) for Fellowships to support attendance at the meeting.

The fellowships will cover the **full cost** of registration, accommodation and meals during the meeting. Applicants and/or their supervisors will be expected to meet the costs of travel themselves.

Applicants should be currently or intending to use proteomics in their research and will be given an opportunity to make an oral presentation at the meeting.

It is anticipated that the ‘MJ Dunn Fellows’ will produce a report of the meeting (by 15th January 2014) that will be presented on the BSPR website and may be considered for publication in other suitable locations.

Please complete the application form (see: www.bspr.org) and send by e-mail to stephen.pennington@ucd.ie (with “MJ Dunn Fellowship” in the subject line) by Tuesday 1st October 2013. Applications should be accompanied by a separate letter or e-mail of support from the applicant’s supervisor - again with “MJ Dunn Fellowship” in the subject line. Late applications will not be considered. Please note applicants must be paid up members of the BSPR but can become members for the purpose of applying for a Fellowship.
